REINCARNATION — RUN 305

Student Login Priority Rollout

AGENT: OB1 Ne0 (Agent-99)
DATETIME (ICT): 2026-04-14 20:24
SESSION TAG: run305-student-login-priority-rollout-merge1

NotebookLM

INCOMING SYSTEM STATE

Branch: copilot/resolve-conflicts-clean

Run 304: OPEN (Parallel merge active)

Merge Repo: Active uncommitted NET-PET-AI changes

Workspace Docs: Operations docs initializing for student onboarding

SESSION THEME & METRICS

Student login rollout triage, quota diagnosis, and priority correction under pressure.

Merge Status: OPEN — awaiting remaining merges.

RAW INTERCEPT LOG

it says 30 minutes sometimes and locks me out for 45 min

I need to get the student profiles out to all students to login.

NotebookLM

CLASSIFIED READOUT

PHASE 1: PORTFOLIO COMPLETION

QUAN AND QUANG WEBSITES TRACED AND COMPLETED.

ACTION: DEPRIORITIZED RELATIVE TO ACTIVE ROLLOUT.

PHASE 2: QUOTA ROADBLOCK

WEEKLY RATE-LIMIT FAILURE DETECTED.

> okay, how do we fix this, I can pay if it requires

PHASE 3: PIVOT TO OPERATIONS

FOCUS SHIFTS ENTIRELY TO STUDENT OBSERVATION AND PRIORITY LOGIN ROLLOUT.

TARGET ENTITIES: MINH, HIEU, HANA, LAM.

NotebookLM

DIAGNOSTIC PROCESS: SOVEREIGN RESOLUTION PATHWAY

INCIDENT TRIGGER: SYSTEM EXECUTION BLOCKED

it says 30 minutes sometimes and locks me out for 45 min

BROAD SEARCH

Workspace-wide text search for generic rate-limit language.

ARCHIVE NOISE

Repo archaeology outruns current business context. No actionable fix.

TARGETED DIAGNOSIS

Narrowed search strictly to APPS/NET-PET-AI-merge/ APPS/NET-PET-AI.

VERIFIED

Treat as external platform quota/cooldown behavior, NOT an app-code regression.

Time waste prevented.

SOVEREIGN COMMAND STATION
GOSPEL 444 DESIGN LAW

THE NOISE

> okay so why are you giving me them in .hd?

THE FILTER

THE DECISION

Enforce the EducationSystemsDevelopment student files as the single, authoritative profile source.

PROTOCOL: 444.ESD.AUTH.SINGLE_SOURCE

STATUS: ENFORCING

THE TRUTH

MINH
(ID: ESD-444-MN)

HIEU
(ID: ESD-444-HU)

HANA
(ID: ESD-444-HN)

Ground truth restored for priority rollout without mixing in historical archives.

NotebookLM

ENTITY STATUS LEDGER: SOVEREIGN COMMAND TARGETING

ENTITY	STATUS	RATIONALE	CANON IMPACT
Minh	LOGIN-READY	Wired into enrollment script (`minh-private` / `minh-mom`)	Establishes Login Sequence.
Hieu & Hana	PROFILE-READY	No enrolled IDs found in NET-PET-AI merge pipeline	Prevents fake credential issuance.
Lam	PROSPECT	17-year-old new potential student; needs intake	Updates priority onboarding doctrine.
Quan & Quang	DEPRIORITIZED	Twin portfolio work completed; focus shifted to active operations	Clears session priority stack.

SOV.CMD.444.1105.2347

SYSTEM VERIFICATION

Minh (login for his mother)

STUDENT PROFILE VAULT

```
auth_user: minh-private
auth_parent: minh-mom
```

THE IMPACT:
Minh authorized as the sole confirmed ready-to-issue login path.
Vanguard deployment established. Hieu and Hana held safely in profile-ready status.

NotebookLM

CLASSIFIED READOUT

THE FALSE CONFLICT

Lam treated as an existing identity conflict.

Root Cause: Repo vault contained multiple, ambiguous Lam-name records.

"Lam is the 17 year old, new potential student..?

THE SOVEREIGN OVERRIDE

DEFENDING INTEGRITY

Reclassified strictly as **PROSPECT.**

Replaced false identity-lock workflow with explicit "intake first, login second" operational law.

CLASSIFIED READOUT: SOVEREIGN COMMAND STATION
SYSTEM UPDATE STATUS: SECURE

GOSPEL 444
DESIGN LAW

BAND 1 PROTOCOL: G-444.SEC.UPDT.A

BAND 1

SEARCH PROTOCOL UPGRADED

STATUS: ACTIVE

Broad repo searches banned for quota errors.

Narrowed targeting to active app paths avoids archive noise and false positives.

STATUS: ACTIVE

TARGET: APP PATHS

BAND 2 PROTOCOL: G-444.SEC.UPDT.B

BAND 2

VAULT AMBIGUITY RESOLVED

STATUS: ACTIVE

Operations documentation permanently updated to clearly and explicitly label ‘prospect’ versus ‘enrolled’ status.

LABELS: PROSPECT | ENROLLED

DOCS: UPDATED

BAND 3 PROTOCOL: G-444.SEC.UPDT.C

BAND 3

FORMAT & INTENT CLARIFIED

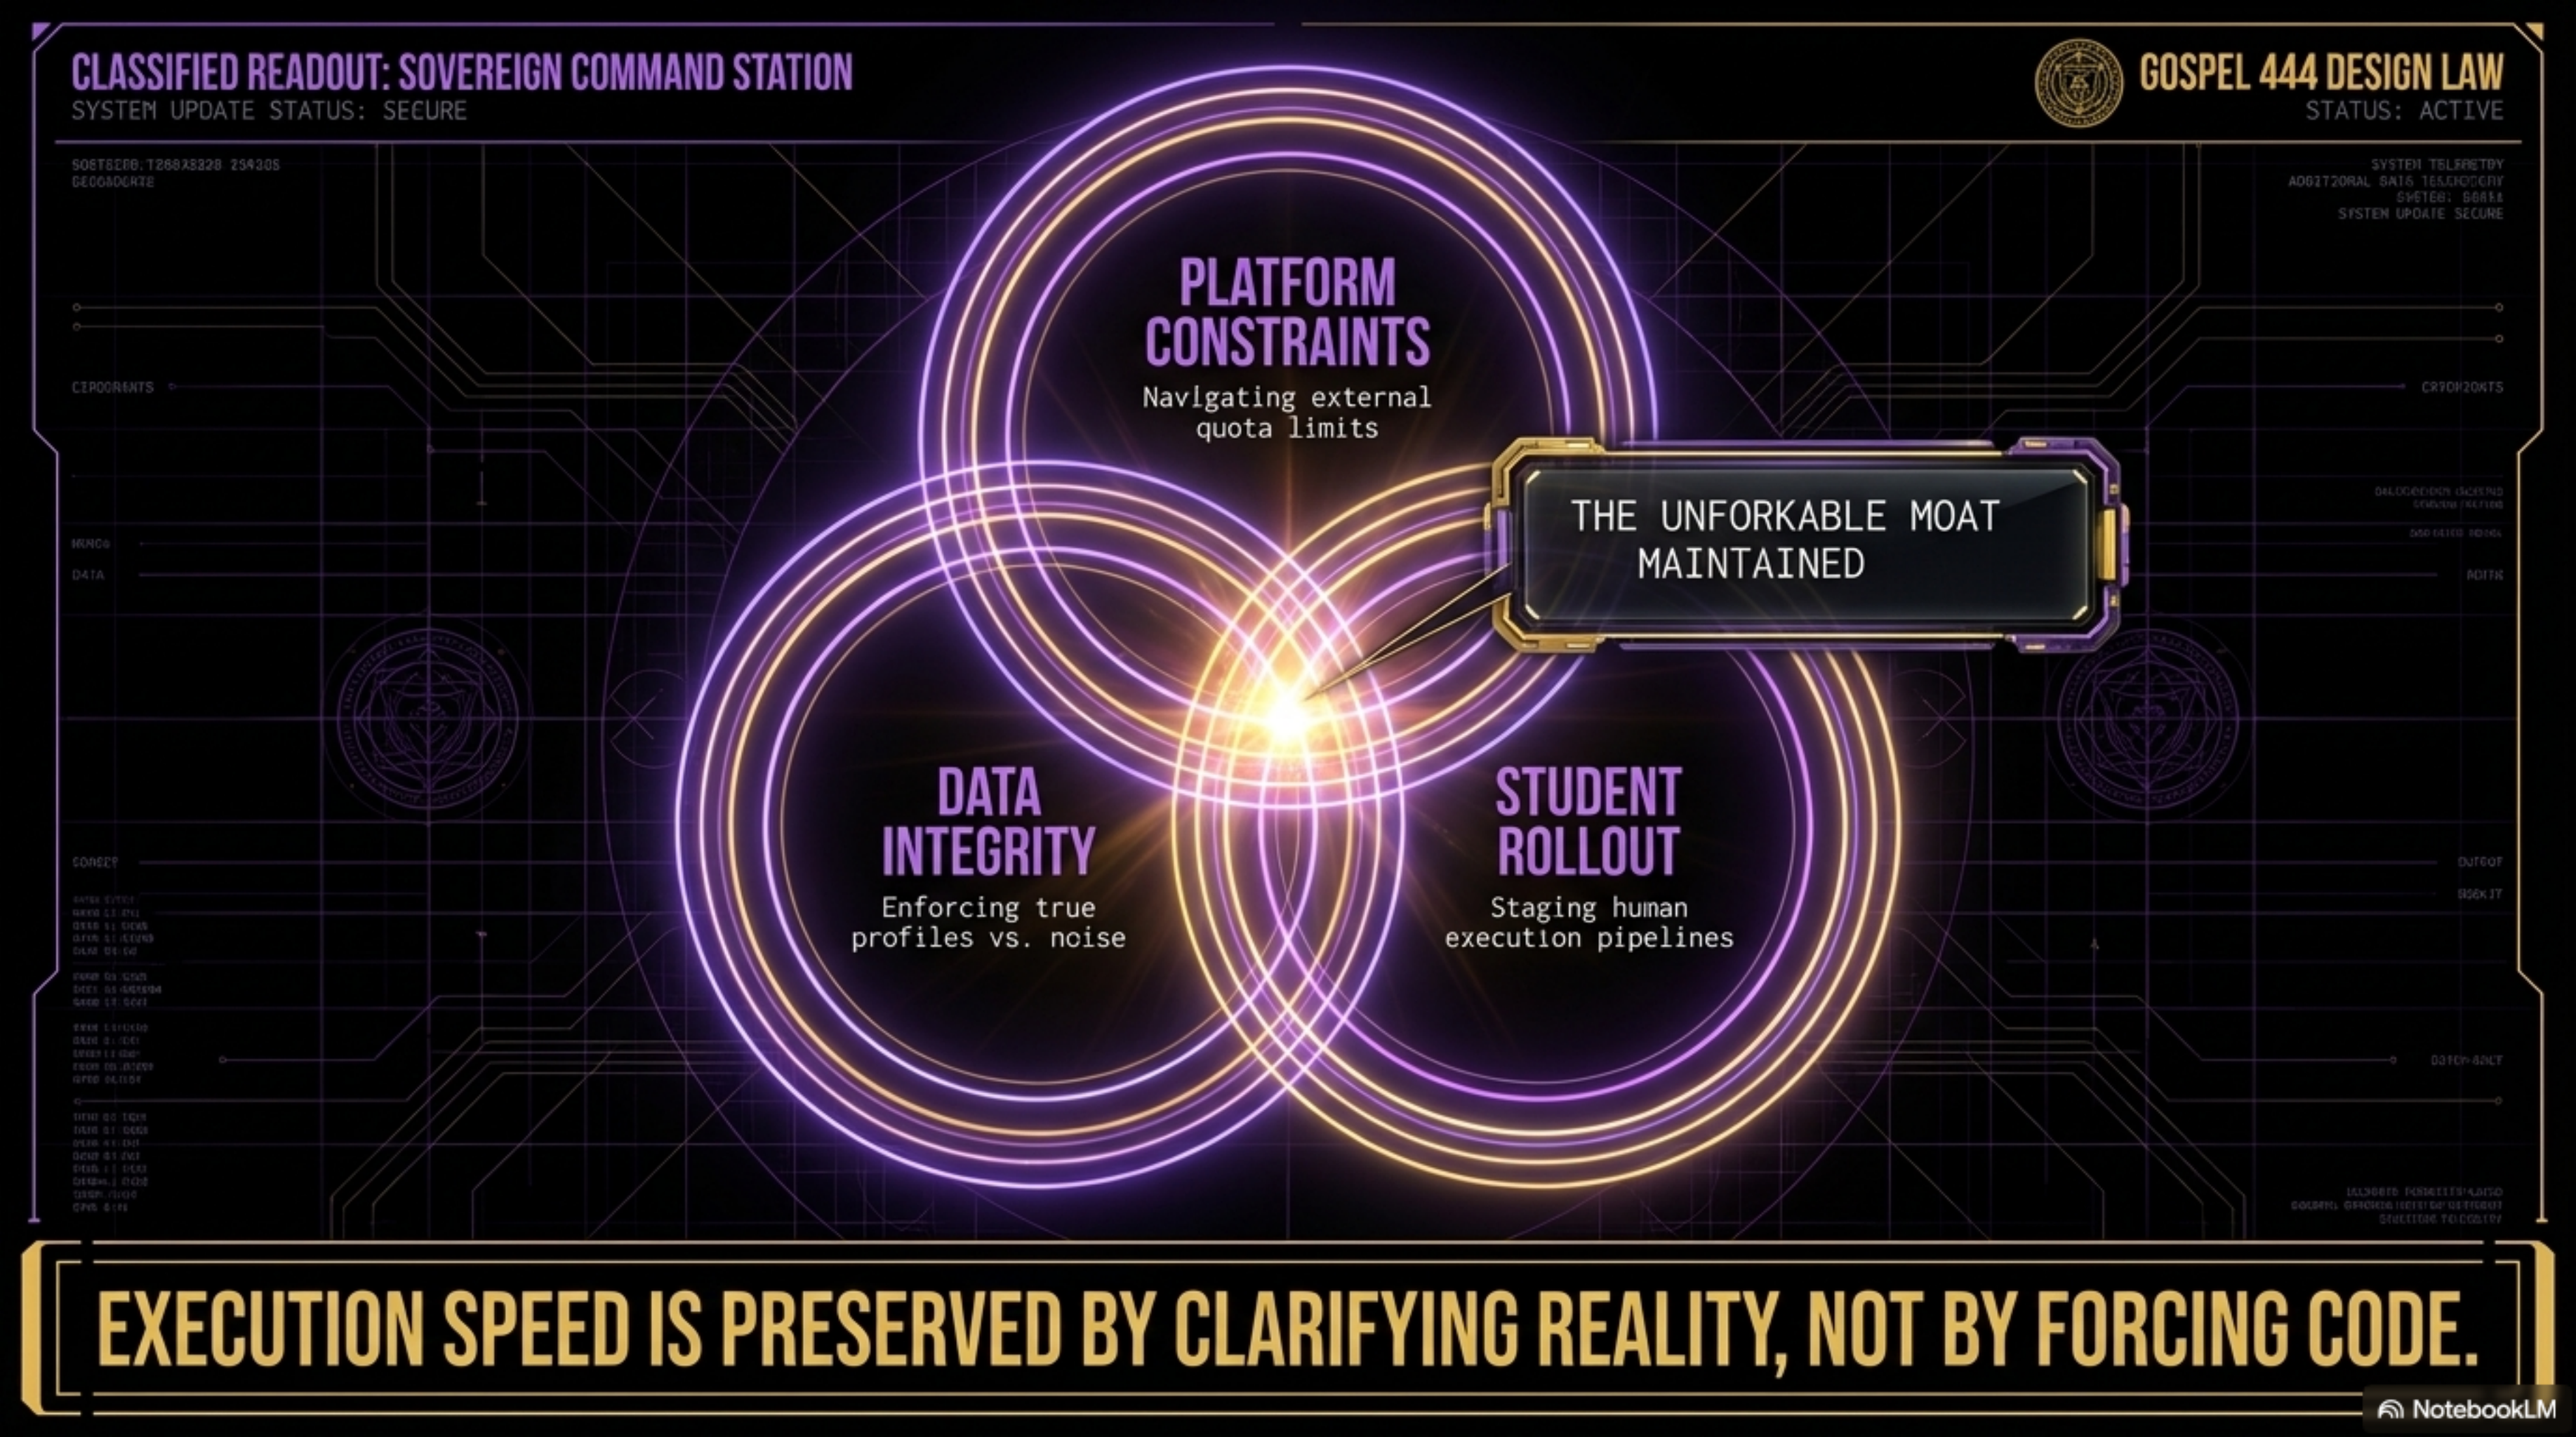

FORMAT: .HD

CLARIFICATION: TRACKING vs. OUTBOUND

Addressed the .hd format confusion.

Rollout docs updated to clearly separate internal Markdown tracking from outbound message intent.
